EMMA MOYSTNER

UI/UX DESIGNER

emmamoystner.design@gmail.com | 865.617.9721 | linkedin.com/in/emmamoystner | Portfolio: emmamoystner.design

PROFESSIONAL SUMMARY

UI/UX Designer with an M.Des in Interaction Design (ArtCenter, August 2026). Designs end to end, from research and user journeys through high-fidelity UI in Figma and coded prototypes in Claude Code, testing with real users and designing for accessibility from the start. Brings four years of cross-functional project coordination at an architecture and engineering firm. A nimble designer who is always learning, currently working through CS50.

EDUCATION

ArtCenter College of Design Pasadena, CA | August 2026

Master of Design, Interaction Design

Tennessee Technological University Cookeville, TN | May 2021

Bachelor of Science, International Business and Cultures | Minors: Spanish, Religious Studies

Certifications: Google UX Design Certificate, Coursera (May 2024) | UI/UX Design Bootcamp, Memorisely (Sep 2024)

RELEVANT PROJECTS

NAV Health, ED Patient Experience M.Des Capstone, ArtCenter | Jun - Aug 2026

- Surveyed 18 people about ER visits; every qualified respondent wanted to know where they stood and why, not just how long they would wait.
- Designed an 11-screen patient app around that finding: a timestamped wait range instead of a countdown, and a triage level that always arrives translated (what it means, what it doesn't, and that it can change).
- Built a design system and coded the prototype across 6 personas and 5 triage levels, then tested it with 2 A/B studies and think-aloud sessions with 4 people.

COROS, Cycle Tracking Redesign Solo, ArtCenter | Sep - Dec 2025

- Researched women's hormonal health through Reddit communities and audited Garmin, WHOOP, Oura, and Fitbit, finding that COROS took cycle data in but gave nothing back to train with.
- Designed iPhone and watch screens in Figma within a rebuilt COROS design system: a Phase Insights card on the Today screen, phase guidance in context, and two-tap period logging.
- Cut a six-screen onboarding to two setup questions and replaced a 28-dot watch face that failed contrast with a legible four-phase arc; audited to WCAG AA (4.5:1 contrast, 44px targets).

Gauge, Vehicle Reporting App Self-Initiated, Barge | 2023 - 2026

- Self-initiated a redesign of Barge's paper vehicle-reporting process: interviewed employees, collaborated with the business on the vehicle inspection safety checks it wanted built in, and refocused the app on trip mileage, the number the business billed.
- Explored three design directions in Figma, cutting a field-for-field form and a multi-screen inspection down to QR auto-fill, a one-screen checklist, and mileage front and center.
- Usability tested the later versions; every tester submitted a report unassisted on the final prototype.

PROFESSIONAL EXPERIENCE

Freelance Designer and Creative Self-Employed | January 2026 - Present

- Lead experience and visual designer for small businesses, owning brand strategy, information architecture, and interface design from discovery through launch.
- Design and build accessible, responsive websites in Figma and Claude Code, each with its own design system carried through to launch.

Project Coordinator Barge Design Solutions | Chattanooga, TN | March 2022 - April 2026

- Designed Gauge, an internal app to replace the firm's paper mileage form (see Projects above).
- Coordinated specification packages, invoicing, and construction administration across 50+ active projects, working directly with the architects, engineers, and clients on each one.
- Title changed from Project Administrator to Project Coordinator in January 2026; same responsibilities throughout.

SKILLS

Research: Stakeholder and user interviews | Requirements gathering | Surveys | Usability testing | A/B testing | Competitive audits | Research synthesis

Design: End-to-end product design | User flows and wireframes | Mockups and high-fidelity UI | Interactive prototypes | Information architecture | Service blueprints | Design systems and reusable components

Accessibility: WCAG AA audits and remediation | Inclusive design | Color contrast, touch targets, screen readers

Collaboration: Cross-functional collaboration | Presenting design rationale to technical and non-technical audiences | Design critique | Agile sprints and Lean UX | Coordinating concurrent projects

Tools: Figma | Figma Make | Figma AI | Claude Code | Jira | Adobe Creative Suite | Miro | Slack
