EMMA MOYSTNER

INTERACTION DESIGNER

emmamoystner.design@gmail.com | 865.617.9721 | linkedin.com/in/emmamoystner | Portfolio: emmamoystner.design

PROFESSIONAL SUMMARY

Interaction designer with an M.Des from ArtCenter who works end to end, from user research to coded prototypes, validated through A/B tests, think-aloud sessions, and WCAG AA audits. 4+ years of project coordination at an architecture and engineering firm, keeping teams aligned and flagging risks early. Built a career out of learning new things fast, and stays nimble enough to keep doing it.

EDUCATION

ArtCenter College of Design Pasadena, CA | August 2026

Master of Design, Interaction Design

Tennessee Technological University Cookeville, TN | May 2021

Bachelor of Science, International Business and Cultures | Minors: Spanish, Religious Studies

Certifications: Google UX Design Certificate, Coursera (May 2024) | UI/UX Design Bootcamp, Memorisely (Sep 2024)

RELEVANT PROJECTS

NAV Health, ED Patient Experience M.Des Capstone, ArtCenter | Jun - Aug 2026

- Conducted user research through an 18-person survey and synthesized qualitative data: every qualified respondent wanted to know where they stood and why, not just their wait time.
- Designed an 11-screen patient app in Figma around that insight, with a timestamped wait range and a plain-language triage level, then coded a live, working prototype in Claude Code on its own design system.
- Ran 2 A/B tests and think-aloud usability tests with 3 patients and 1 ER nurse, which refined the information architecture and removed nurse surnames for privacy.

COROS, Cycle Tracking Redesign Solo, ArtCenter | Sep - Dec 2025

- Researched women's hormonal health, gathered user insights from Reddit communities, and audited Garmin, WHOOP, Oura, and Fitbit, finding the gap: COROS took cycle data in but gave nothing back to train with.
- Designed high-fidelity iPhone and watch interfaces in Figma within a rebuilt COROS design system: a Phase Insights card and two-tap period logging, turning cycle data COROS already collected into phase-based training guidance.
- Usability tested with 5 participants and reworked the information architecture where they struggled, then remediated the designs against an accessibility audit covering contrast, touch targets, and screen-reader labels.

Gauge, Vehicle Reporting App Solo, Barge | 2023 - 2026

- Redesigned Barge's paper vehicle-reporting process: ran user interviews with employees, gathered requirements from business stakeholders on safety checks, and prioritized trip mileage, the number the business billed.
- Iterated through three design directions in Figma, cutting a field-for-field form down to QR auto-fill and a one-screen checklist; usability testing with drivers and administrators reached a 100% unassisted task completion rate.
- Prototyped an admin side in Figma and Claude Code to streamline data entry into the firm's accounting program, which had no API to connect to, designed to cut errors and save time.

PROFESSIONAL EXPERIENCE

Freelance Designer and Creative Self-Employed | January 2026 - Present

- Lead experience and visual designer for small businesses, owning brand strategy, information architecture, and interface design from discovery through launch.
- Design and build accessible, responsive websites in Figma and Claude Code, each with its own design system carried through to launch.

Project Coordinator Barge Design Solutions | Chattanooga, TN | March 2022 - April 2026

- Designed Gauge solo, an app to replace paper vehicle reporting and scale with the firm's growing workforce.
- Coordinated specification packages, invoicing, and construction administration across 50+ active projects, working directly with the architects, engineers, and clients on each one.
- Tracked schedules across those projects, raised slipping deadlines and risks with project managers early, and coordinated quality audits to maintain internal standards.

SKILLS

Research: Stakeholder and user interviews | Requirements gathering | Surveys | Competitive audits | Synthesis

Design: End-to-end product design | User flows and wireframes | Mockups and high-fidelity UI | Interactive prototypes | Information architecture | Service blueprints | Design systems and reusable components

Testing and accessibility: Usability testing and think-aloud sessions | A/B testing | WCAG AA audits and remediation | Inclusive design

Collaboration: Cross-functional collaboration | Presenting design rationale to technical and non-technical audiences | Design critique | Agile sprints and Lean UX | Coordinating concurrent projects

Tools: Figma | Figma Make | Claude Code | Jira | Jitter | Adobe Creative Suite | Miro | Slack
